

## Product Datasheet | HLA-C\*06:02 easYmer® kit

<b>Application</b>	<p>easYmers® are peptide loadable HLA class I monomers.</p> <p>easYmers® can be used to generate peptide-HLA monomers with your choice of peptide. The monomers can easily be tetramerized with fluorophore conjugated streptavidin and used to analyse T cells by flow cytometry. The easYmer reagent can also be used to evaluate specific peptide-HLA I binding.</p>
