Human EGF antiserum (Rabbit)

Description

Human epidermal growth factor (EGF) antiserum was prepared by immunising rabbits with human EGF conjugated to ovalbumin. It cross-reacts 100% with human EGF and 56% with L-EGF. Cross-reactivity to human TGF- α is < 0.01%. This antiserum can be used to develop immune based assays and detection systems for human EGF.

Reference:	Xian CJ et al (1996) Journal of Molecular Endocrinology 16, 89-97
Immunogen:	Human EGF conjugated to ovalbumin
Source:	Rabbit antiserum
Specificity:	Human EGF and porcine EGF 100%. L- EGF 56%. Mouse EGF, Human TGF-α, L- TGF-α <0.01%.
Appearance:	Lyophilized powder
Storage/Stability:	At least 2 years at 2 - 4°C (lyophilized). After reconstitution store at -20°C or -80°C Avoid freeze-thaw cycles
Reconstitution:	Dissolve the vial contents in 50μ l sterile water and dilute in a buffer suitable for the application.
Application and Titre:	Each application and titre should be determined in house but as a guideline: Determination of EGF by radioimmunoassay 1:500,000. Immunocytochemistry ~1:500. Western blotting 1:5000.
Product Codes and Pricing	

Human EGF antiserum	5 µl	PAD1

Related Products:	Human L-EGF
