## **GroPep Bioreagents**

## **IGFBP-6 Polyclonal Antibody (Rabbit)**

## **Description**

This IGFBP-6 antibody was prepared by immunising rabbits with a 15 amino acid peptide derived from the central domain of human IGFBP-6, linked to diphtheria toxoid. The peptide sequence is unique to IGFBP-6. The antibody recognises IGFBP-6 but not IGFBP-1, 2, 3, 4, 5 or related proteins. Although the sequence is derived from human IGFBP-6, the antibody does recognise IGFBP-6 from several species, although this should be experimentally determined. The immunoglobulin fraction was purified by Protein A affinity chromatography. The antibody is suitable for use in immunoassay, immunoblotting and immunohistochemistry.

References: Shimasaki S et al (1991) Molecular Endocrinology 5, 938-948

Immunogen: Derived from UniProtKB/Swiss-Prot sequence ID P24592 human

IGFBP-6. The peptide sequence is amino-acids 114-128 (IGFBP-687-

<sub>101</sub>) conjugated to diphtheria toxoid.

Source: Affinity purified rabbit antiserum

**Specificity:** Recognises human and rat IGFBP-6. Specificity for other species

should be determined. No cross-reactivity against IGFBP-1, 2, 3, 4 or

**Appearance:** Lyophilized powder

Storage/Stability: At least 2 years at 2 - 4°C (lyophilized).

After reconstitution store at -20°C or -80°C

Avoid freeze-thaw cycles

Reconstitution: Dissolve the vial contents in 200 µl sterile water and then dilute in a

buffer suitable for the application.

**Application and Titre:** Each application and titre should be determined in house.

The recommended range for use is 1:250 - 1:10,000.
