

Human TGF- α antiserum (Rabbit)

Description

Human TGF- α antiserum was prepared by immunising rabbits with human TGF- α conjugated to ovalbumin. It cross-reacts 100% with human TGF- α and 50% with L-TGF- α . Cross-reactivity to human EGF is < 0.01%. This antiserum can be used to develop an enzyme immunoassay for TGF- α .

| | |
|-------------------------------|--|
| Immunogen: | Human TGF- α conjugated to ovalbumin |
| Source: | Rabbit antiserum |
| Specificity: | Human TGF- α , 100%. L- TGF- α , 50%. Human EGF <0.01%. |
| Appearance: | Lyophilized powder |
| Storage/Stability: | At least 2 years at 2 - 4°C (lyophilized). After reconstitution store at -20°C or -80°C Avoid freeze-thaw cycles |
| Reconstitution: | Dissolve the vial contents in 500 μ l sterile water and dilute in a buffer suitable for the application. |
| Application and Titre: | Each application and titre should be determined in house but as a guideline - Determination of TGF- α by enzyme immunoassay 1:1000. |
